

Big Time Blue Lavender

Lavandula angustifolia 'Armtipp01'

Plant Height: 16 inches

Flower Height: 22 inches

Spread: 24 inches

Sunlight: ☉

Hardiness Zone: 4b

Other Names: English Lavender, Common Lavender

Description:

Long lasting and large, purplish-blue blooms on compact plants, from spring to late summer; dense, silvery, gray-green foliage is very aromatic; a perfect choice for edging or massing in the garden

Ornamental Features

Big Time Blue Lavender has masses of beautiful spikes of fragrant lavender flowers with purple overtones rising above the foliage from late spring to late summer, which are most effective when planted in groupings. The flowers are excellent for cutting. Its attractive fragrant needle-like leaves are grayish green in color with hints of silver. The foliage often turns coppery-bronze in fall.

Landscape Attributes

Big Time Blue Lavender is a dense herbaceous evergreen perennial with a mounded form. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This is a relatively low maintenance plant, and can be pruned at anytime. It is a good choice for attracting bees and butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Big Time Blue Lavender is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Container Planting

Planting & Growing

Big Time Blue Lavender will grow to be about 16 inches tall at maturity extending to 22 inches tall with the flowers, with a spread of 24 inches. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 10 years. As an evergreen perennial, this plant will typically keep its form and foliage year-round.

This plant should only be grown in full sunlight. It prefers dry to average moisture levels with very well-drained soil, and will often die in standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for a low-water garden or xeriscape application. It is not particular as to soil type, but has a definite preference for alkaline soils, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.

Big Time Blue Lavender is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It can be used either as 'filler' or as a 'thriller' in the 'spiller-thriller-filler' container combination, depending on the height and form of the other plants used in the container planting. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
